

Digital Practice Hub: Strategic Proposal & Forensic Audit

Prepared for Reddy Medical Group, Inc. | Dr. Kiran Manthani Reddy, MD

Over 30 Years of Exceptional Care

Dedicated adult internal medicine and inpatient hospitalist care in the San Joaquin Valley.

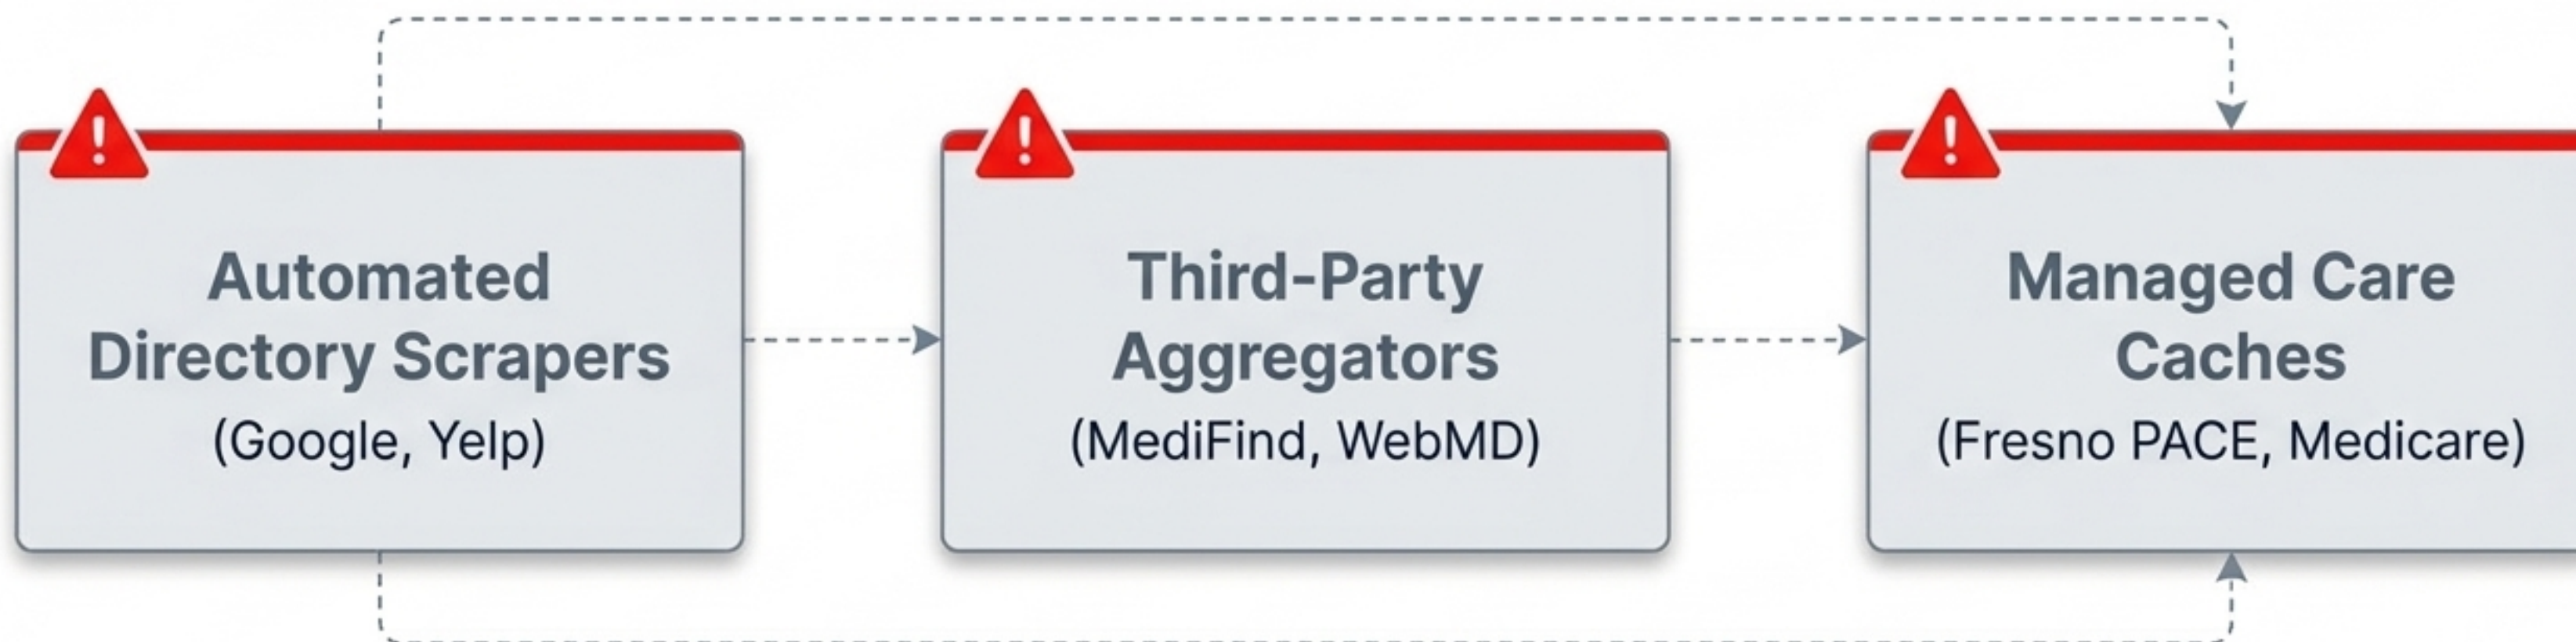

Because Reddy Medical Group lacks an official digital footprint, automated scrapers, health plan directories, and third-party portals have filled the void with **inaccurate, contradictory, and conflated** clinical data

The Active Threat of a Digital Vacuum

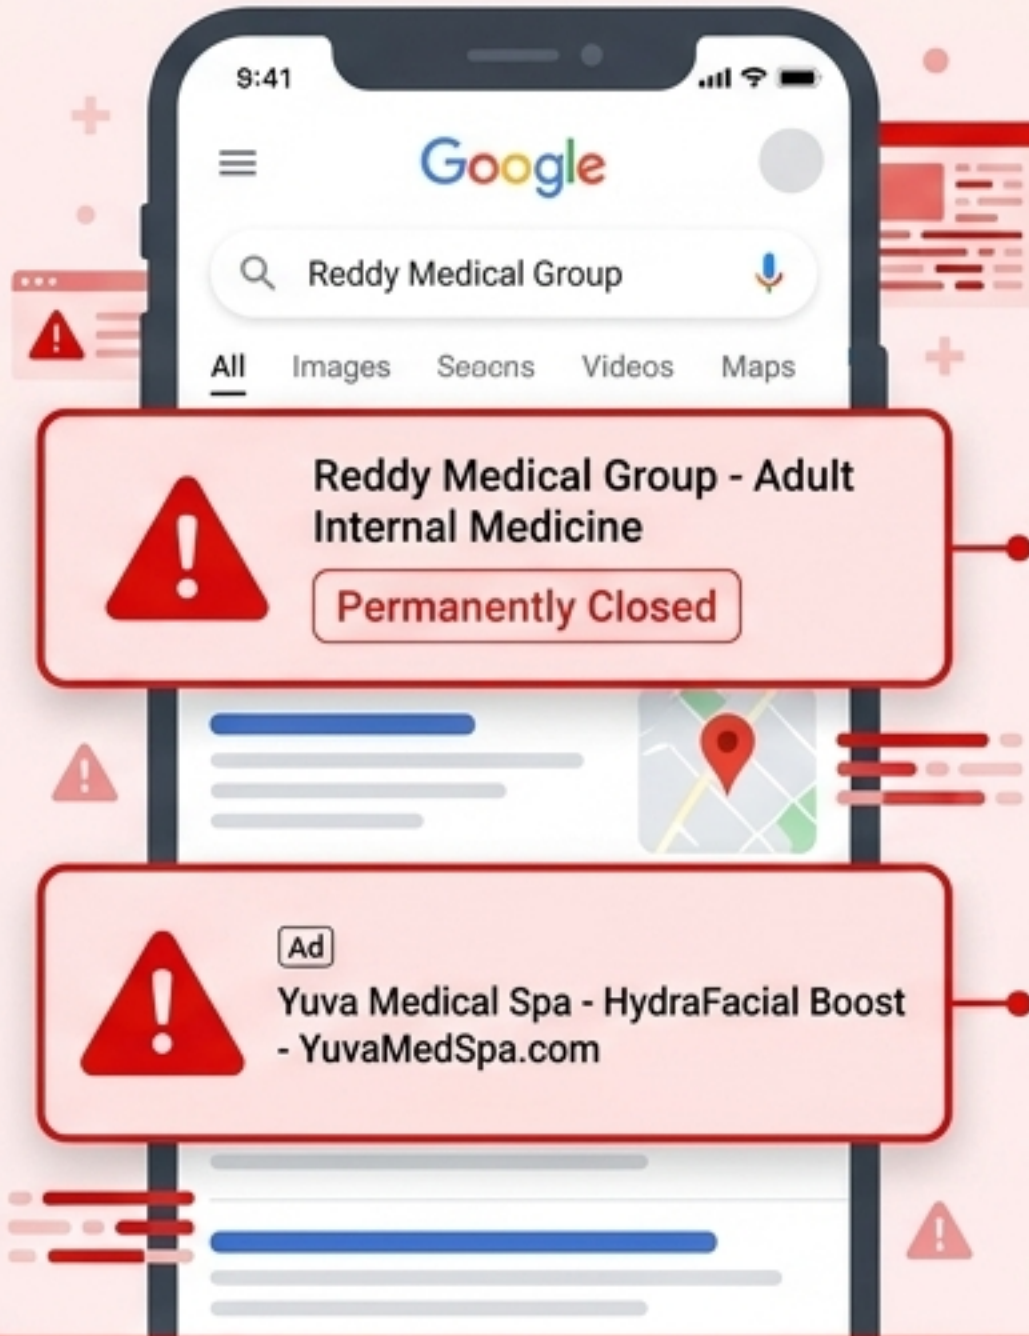

Live Forensic Audit: The Current Digital Pathology

The following pages document exact data corruptions actively visible to your patients, referring physicians, and hospital discharge coordinators across major healthcare directories.

Brand Hijacking & False Practice Status

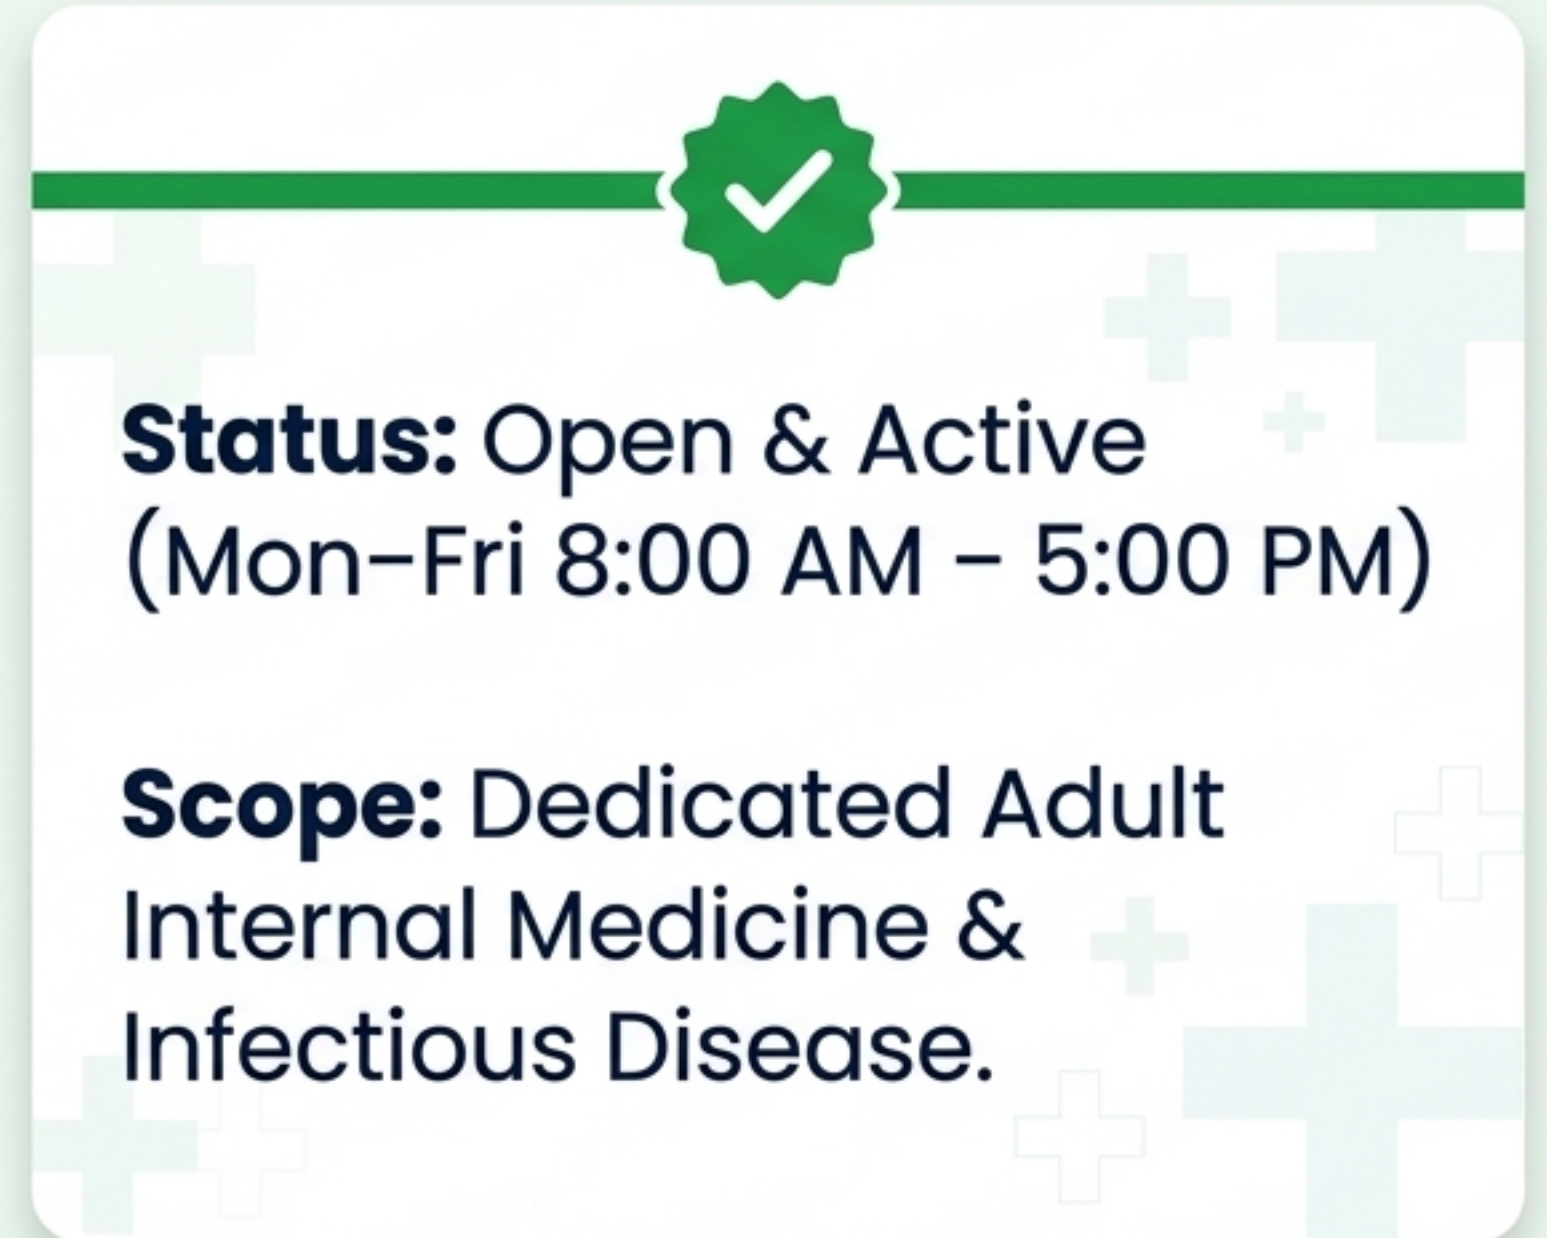

The Web: Digital Errors & Hijacking

Scraper algorithms default to '**Permanently Closed**' without a domain to verify active hours.

Google Knowledge Graph redirects patients to Dr. Ram K. Reddy's Urgent Care & MedSpa in Georgia.

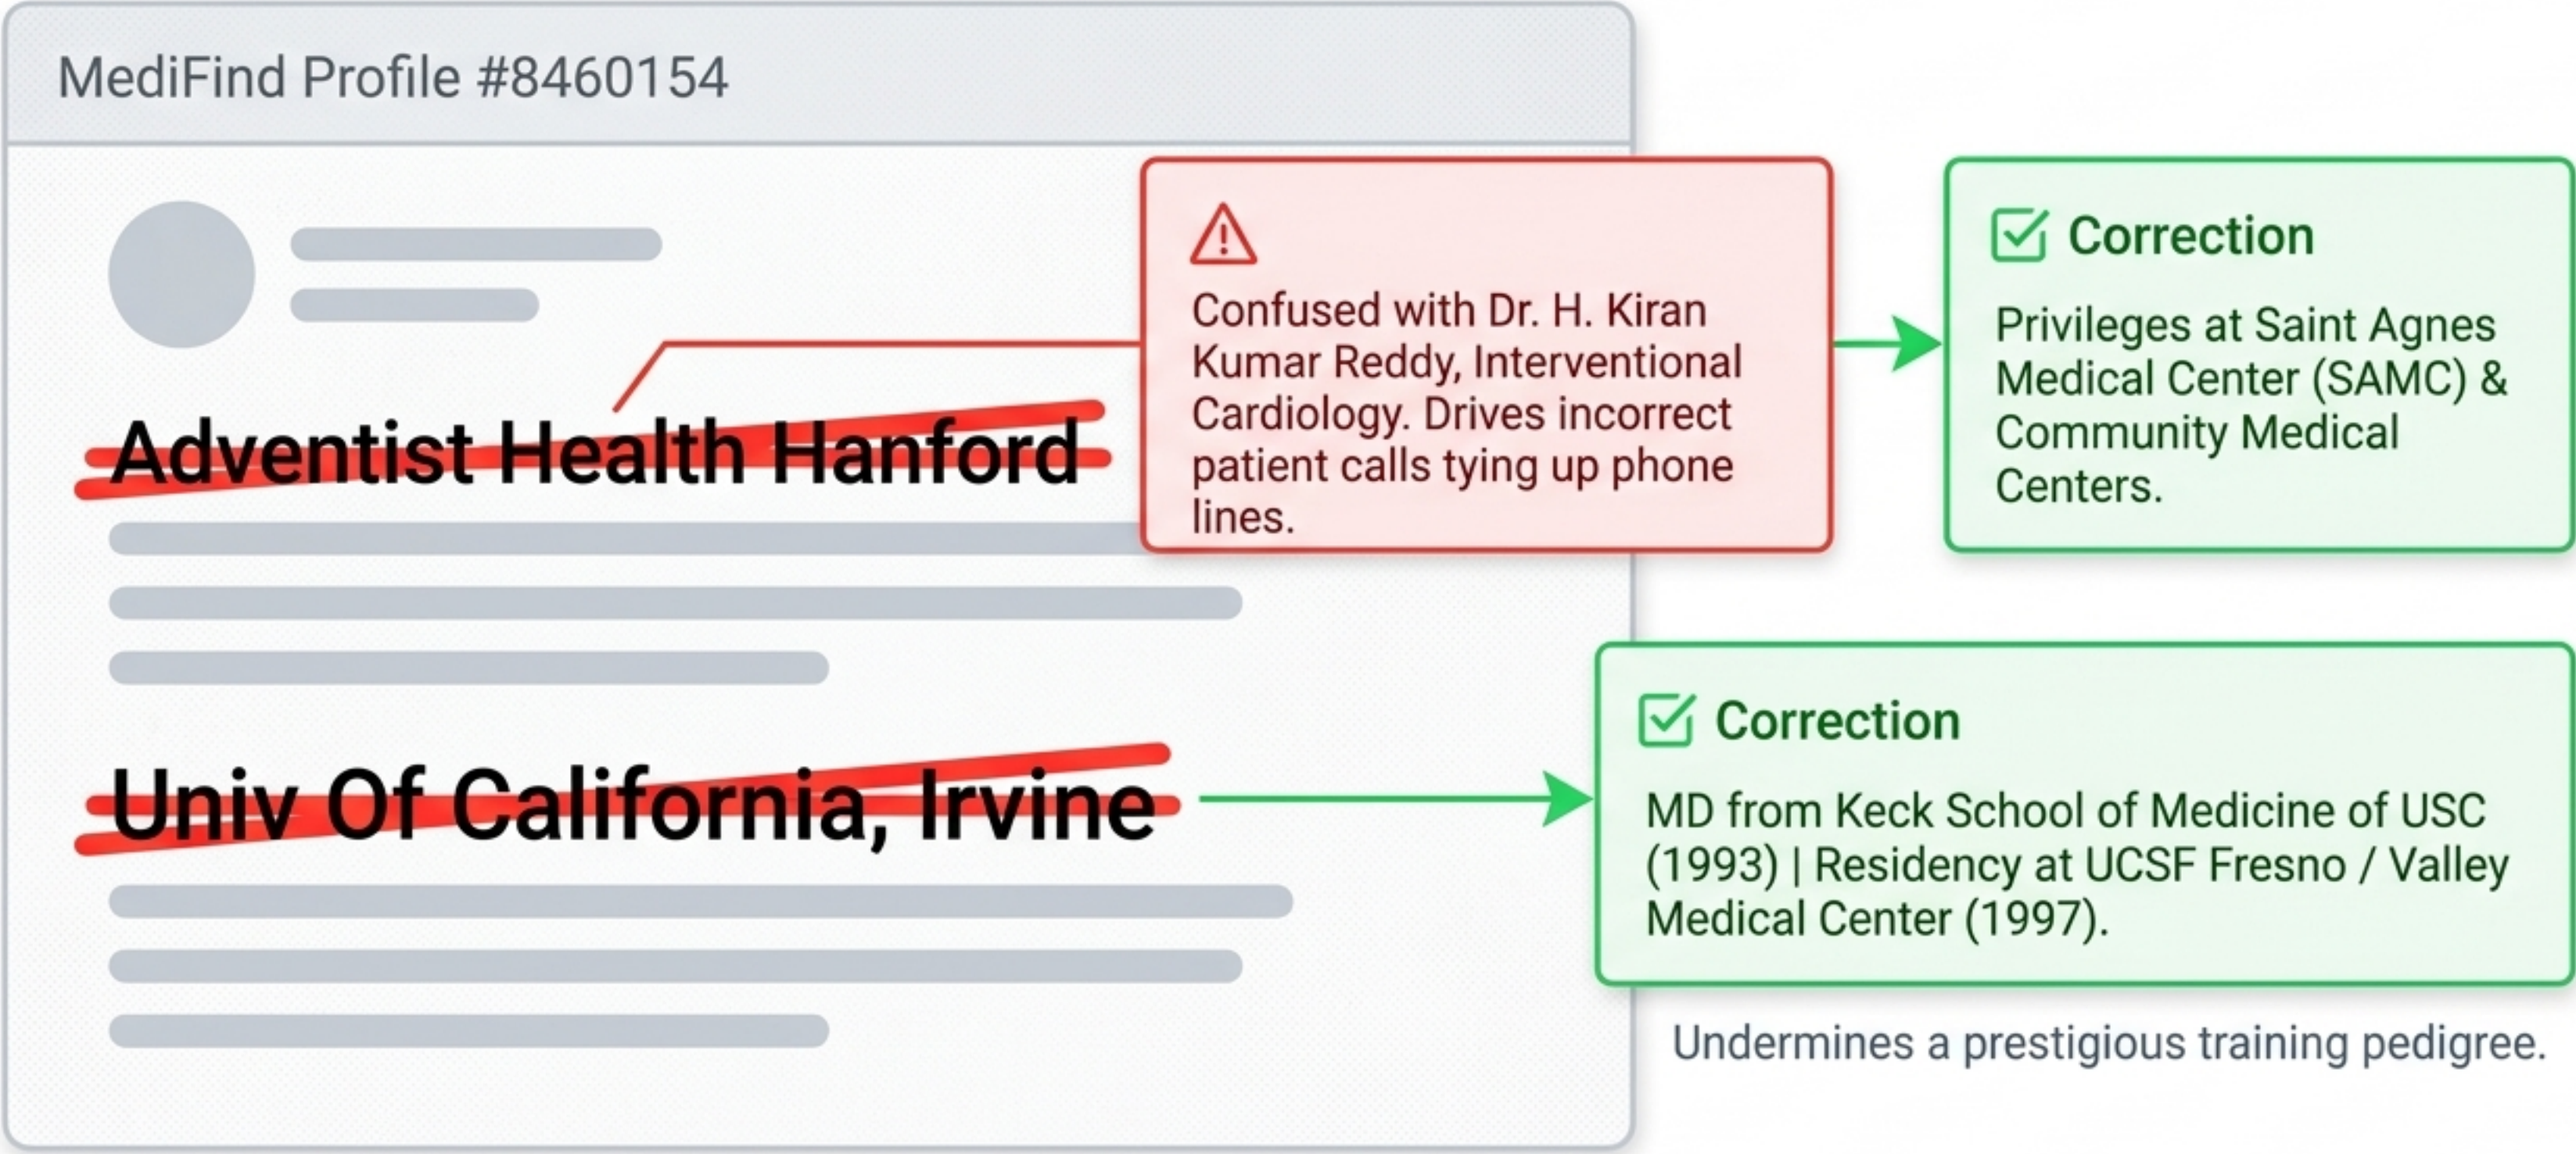

The Reality: Clinical Facts & Verified Status

Status: Open & Active
(Mon–Fri 8:00 AM – 5:00 PM)

Scope: Dedicated Adult
Internal Medicine &
Infectious Disease.

Severe Identity & Credential Conflation

Operational Roadblocks & Hidden Medical Authority

Suite Discrepancies

Directories blend Meridian Professional Center suites.

Result: Patients wander the complex or interrupt billing staff in Suite 108 instead of checking in at Suite 101.

Buried Scholarship

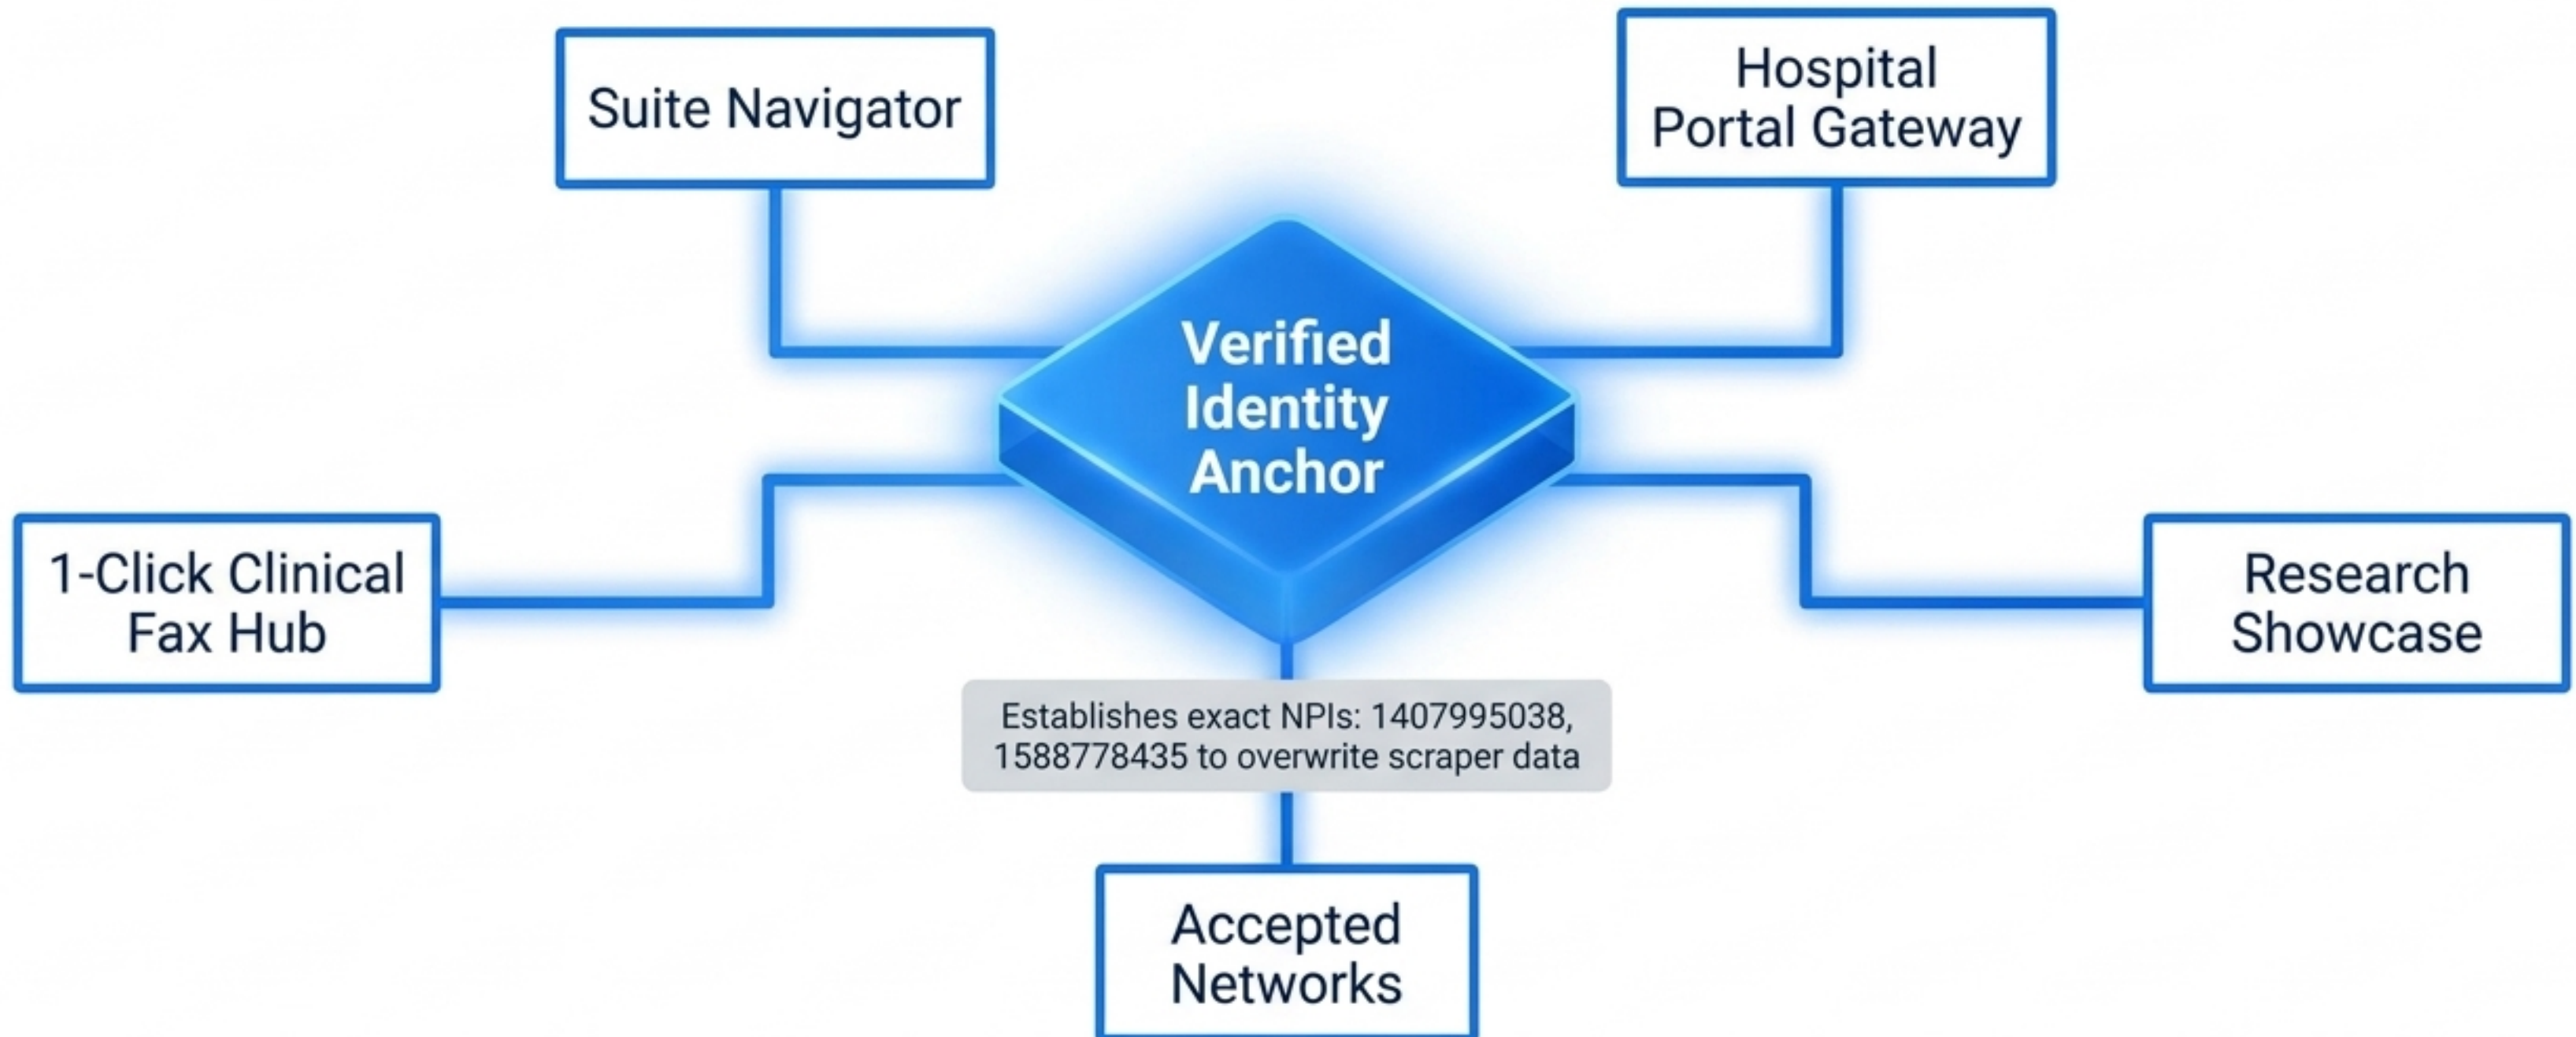

27 peer-reviewed clinical articles co-authored by Dr. Reddy are indexed but entirely invisible to patients and networks, missing a critical opportunity to establish E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness).

The Diagnostic Summary: The Web vs. Reality

 What Third-Party Directories Report	 Verified Clinical Reality
May be permanently closed	Open & Active (Mon–Fri 8-5)
Univ. of California, Irvine	Keck School of Medicine of USC (1993)
Includes Adventist Health Hanford	Saint Agnes & Community Medical
Inconsistent mix of 101/108	Suite 101 (Clinical) & 108 (Admin)
Conflated with Georgia MedSpa	Internal Medicine & Hospitalist
Buried in indexes	27 Peer-Reviewed Publications

The Solution: An Operational Digital Front Door

Not an expensive marketing funnel. A lightweight, authoritative hub built to eliminate daily friction.

Key Hub Capabilities & Friction Reduction

Suite Navigator

Visually directs clinical visits to Suite 101 and administrative mail to Suite 108.

1-Click Fax Hub

Verified primary clinical fax (559-369-2488) and admin fax (559-446-0409) with instant-copy for discharge planners.

Hospital Portal Gateway

Direct routing to SAMC (Trinity) and Community Medical (MyChart) so patients access their own inpatient records.

Accepted Networks

Pre-screens calls by listing Medicare, Medi-Cal, Alignment, Humana, and PPOs.

Scholarship Showcase

Highlights USC/UCSF credentials and the 27 peer-reviewed articles.

Medical Schema.org

Embedded machine-readable code that automatically forces Google and Apple Maps to display correct hours and location.

Technical Security & Zero-Liability Profile

100% HIPAA Safe

Zero Protected Health Information collected. No unencrypted messaging forms or patient databases.

Zero Maintenance

Built on pure HTML5/CSS3. No WordPress databases to hack, no security patches to install, no ongoing overhead.

ADA / WCAG 2.1 AA Compliant

High-contrast trust palettes, screen-reader accessible, and fully mobile optimized.

Operational & Financial ROI for Practice Management

1 to 2

Hours Daily

Staff Time Saved.

Eliminates 15-25 repetitive daily calls regarding directions, faxes, and portals.
~\$6,000–\$10,000 in annual administrative efficiency.

100%

Routing Accuracy

Referral Protection.

Prevents lost specialty consults and delayed hospitalist follow-ups caused by scrapers listing the practice as closed.

< \$15

Per Year

Negligible Cost.

Once deployed, the static hub operates on secure enterprise delivery networks requiring only basic domain registration costs.

Recommended Action Plan

1

Review Working Prototype

Inspect the completed code—index.html, styles.css—already built and verified in the workspace.

2

Secure the Practice Domain

Register a clean, professional domain such as reddymedicalgroupfresno.com.

3

One-Day Deployment

Connect domain to secure hosting and submit the verified URL to Google Search Console to Google Search that immediately overwrite erroneous scraper data.

Reclaim Dr. Reddy's digital narrative with an authoritative anchor worthy of 30+ years of dedicated patient care.
